

About Stop Calderdale Wind Farm

Stop Calderdale Wind Farm Objectives

This website (www.stopcalderdalewindfarm.co.uk) is part of a campaign called Stop Calderdale Wind Farm set up and run by local volunteers who are opposed to the proposed Calderdale Wind Farm on the Walshaw Moor Estate Site of Special Scientific Interest (SSSI) near Hebden Bridge in West Yorkshire.

The key objectives of the Stop Calderdale Wind Farm campaign directly associated with this website are:

- To raise awareness about the detrimental environmental impact of the proposed wind farm on the countryside, wildlife, people and cultural heritage of Walshaw Moor, the Upper Calder Valley, Calderdale and the neighbouring parishes and boroughs in Yorkshire and Lancashire.
- To disseminate information about the proposed wind farm to the public and relevant organisations through various means, including this website, and to encourage individuals and groups to object to Calderdale Wind Farm through appropriate channels, including the Local Planning Authority (Calderdale Council).
- To engage with the local community and with relevant organisations and individuals in order to develop a network of contacts and supporters to oppose Calderdale Wind Farm by any appropriate means.
